

CAN I COMBINE SCIENCE AND BUSINESS IN A SINGLE JOB?

**YES.**

We'll show you how at Fraunhofer IIS.

For the »**Audio and Media Technologies**« division in **Erlangen**, the Fraunhofer Institute for Integrated Circuits IIS is currently seeking a

---

## Student Assistant for Front-End Development

---

The »**Audio and Media Technologies**« division of Fraunhofer IIS constitutes one of the world's largest organizations dedicated to audio, speech and media processing. It has been an innovator in sound and vision for over 25 years and repeatedly won international competitions in the audio and media field: e.g. with mp3 and codecs of the AAC-family. Over 200 engineers and scientists develop first-rate technology, which is sold worldwide, in Europe, USA, China, Korea and Japan. Our Group for **Natural Language Processing** combines methods from computational linguistics and machine learning to develop digital products and services to improve human-machine interaction.

### Your tasks:

- You support us with the development of the front-end for our annotation platform
- You assist in the building of a database management system

### Your profile:

- You are currently studying Computer Science, Software Engineering or a related field
- You have a background in web development
- You are familiar with Javascript, Html/CSS and Python (familiarity with SQL is a plus)
- You are highly motivated to learn, work on complex tasks in an interdisciplinary team and use creativity for solving problems
- You have good English and German communication skills

### What you can expect from us

- **Flexibility** concerning your working hours
- Collaboration in a **committed** and **interdisciplinary** team
- An **open** and **cooperative** working environment
- Collaboration in **interesting** and **innovative projects**
- Many opportunities to gain **practical experience** and **attend seminars**

Weekly working hours are determined by agreement.
